Issues and Facts

- Bus companies are increasing, but the number of buses is decreasing.
- Inaccurate passenger data due to free rides, illegal ticket brokers, and riding buses from unofficial places.
- Not integrated and non-digital system.
- After Covid-19, the number of intercity bus (Bus AKAP/AKDP) passengers has decreased.
- Buses are an essential mode of transportation which has different functions from trains and planes.

Our Solution

What is INA Bus Apps?

- Bus drivers often face challenges such as on-time performance, optimal routes, and reporting technical issues.
- This app is designed to assist drivers by providing relevant information in real time so they can perform their duties more efficiently and safely.
- This app can scan tickets, count passengers, tracking bus and selling tickets.

Benefits and Experiences

Convenience

Make it easier for drivers to perform their daily tasks by providing integrated tools & Low use of physical tickets.

Support

Ensures drivers can report problems and get help quickly.

Effeciency

Assists drivers in effectively managing their time and routes.

NETWORKS INDONESIA AKU

Main Features

1

Find a Travel Route

- Route Search
- Travel Scheduling
- Travel Time Estimates
- Maps and Navigation
- Real-time Updates
- Comfortable Use

Main Features

2

Seat Layout

- Safety and Comfort
- Check Availability
- Arrangement and Planning
- Capacity Management
- Improved Customer Service
- Reduces Confusion

NETWORKS INDONESIA AKU

Main Features

3

Scan Tickets

- Ticket Validation
- Speed and Efficiency
- Security
- Data Collection
- Passenger Comfort
- Reducing Paper
- Integration with Other Systems
- Real time Tracking

NIA
NETWORKS INDONESIA AKU

Main Features

4

GPS Tracking

- Real-time Tracking
- Increased Operational Efficiency
- Security and Monitoring
- Quick Resolution of Issues
- Increased Transparency
- Analytics Data
- Monitoring Driver Performance

Main Features

5

Tickets Cancellation

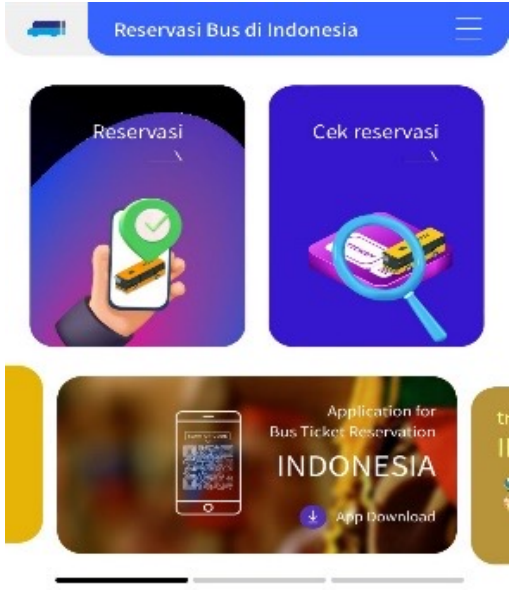
- Ease of Cancellation
- Flexible Time
- Prevention of Fund Leakage
- Booking Management
- Minimization of Physical Contact
- Improved User Experience

Main Features

6

Sell Tickets (Future)

- Can sell tickets anywhere and anytime



GPS Features

Turn-by-Turn Navigation: INA BUS GPS navigation application to provide real-time navigation instructions. It includes information on directions, alternative routes, estimated arrival times, and traffic conditions.

The ability to accurately determine position and use this location information effectively adds great value to the user experience of modern applications, especially transportation.
